Lab instructions

Goal

The objective of this Lab is to provide you with an opportunity to practice how to create a database, a table and insert data.

❖ Task 1

Scenario

Mr. Saif Chaabouni owns a small bookshop. He decides to build a digital database to maintain data about his customers electronically instead of using pen and paper. In this Lab, you'll build the bookshop database.

Instructions

Please attempt the below tasks before you continue, so you can check and compare your answers with our solution.

1. Create a database called **bookshop**.
2. Create a table called **customers** with **customer ID, name, and address.**
3. Insert a record of data for one customer

Customer ID	Customer name	Address
1	Ines	115 Old street Belfast
2	Farah	24 Carlson Rd London
3	Maryem	5 Fredrik Rd, Bedford
4	Samah	10 Copland Ave Portsmouth
5	Oumayma	15 Fredrik Rd, Bedford
6	Kalthoum	110 Copland Ave Portsmouth

4. Get and display the content of the **customers** table.
5. Write the SQL statement to delete the with the condition customerID = 3.
6. View the content of the customers table after deleting the record.
