Lab instructions

Goal

- The goal of this Lab is for you to learn how to filter data using WHERE clause and logical operators.

❖ Task 1

Scenario:

Lucky Shrub is a medium-sized garden design firm that sells indoor and outdoor plants, making them a one stop shop for clients. In this lab, you are going to complete the following tasks to make it easier for Lucky Shrub staff to print relevant order data on the screen.

The Orders table contains information about the Order ID, Client ID, Product ID, Quantity and Cost as shown below.

OrderID	ClientID	ProductID	Quantity	Cost
1	C11	P1	10	500.00
2	C12	P2	5	100.00
3	C13	P3	20	800.00
4	C14	P4	15	150.00
5	C13	P3	10	450.00
6	C12	P2	5	800.00
7	C11	P4	22	1200.00
8	C13	P1	15	150.00
9	C11	P1	10	500.00
10	C12	P2	5	100.00

To complete this lab, you must have the Lucky Shrub database created in MySQL. Also, you must have the Orders table created and populated with relevant data inside Lucky Shrub.

Instructions

1. Create **luckyshrub_db** database
2. Use database
3. Create **Orders** table
4. Insert data
5. Write a SQL statement to print all records of orders where the cost is $250 or less.
6. Write a SQL statement to print all records of orders where the cost is between $50 and $750.

7. Write a SQL statement to print all records of orders that have been placed by the client with the id of Cl3 and where the cost of the order is more than $100.
8. Write a SQL statement to print all records of orders that have a product id of p1 or p2 and the order quantity is more than 2.

Task 2

Scenario:

Based in Tuscon, Arizona, Lucky Shrub is a medium-sized company specializing in garden design, creation, maintenance and landscaping. The company also runs a small nursery that sells indoor and outdoor plants.

Lucky Shrub has seven employees who work in six different departments.

Here's the database table (employees) with their details:

EmployeeID	EmployeeName	Department	ContactNo	Email	AnnualSalary
1	Seamus Hogan	Recruitment	351478025	Seamus.h@luckyshrub.com	50000
2	Thomas Eriksson	Legal	351475058	Thomas.e@luckyshrub.com	75000
3	Simon Tolo	Marketing	351930582	Simon.t@luckyshrub.com	40000
4	Francesca Soffia	Finance	351258569	Francesca.s@luckyshrub.com	45000
5	Emily Sierra	Customer Service	351083098	Emily.s@luckyshrub.com	35000
6	Maria Carter	Human Resources	351022508	Maria.c@luckyshrub.com	55000
7	Rick Griffin	Marketing	351478458	Rick.G@luckyshrub.com	50000

Instructions

1. Create employees table
2. Insert the appropriate data in the employees table
3. Use the AND operator to find employees who earn an annual salary of $50,000 or more attached to the Marketing department.
4. Use the NOT operator to find employees not earning over $50,000 across all departments.
5. Use the IN operator to find Marketing, Finance, and Legal employees whose annual salary is below $50,000.
6. Use the BETWEEN operator to find employees who earn annual salaries between $10,000 and $50,000.
7. Use the LIKE operator to find employees whose names start with 'S' and are at least 4 characters in length.
